PROFESSIONAL PROFILE

Results-driven Industrial Engineer and Data Analyst with 2+ years of experience in process optimization, data analysis, and inventory control. Proficient in using tools such as SQL, Power BI, Excel and Python to identify patterns, trends, and opportunities in data to drive informed decisions. Passionate about turning raw data into valuable insights to enhance decision making throughout the organization.

PROFESSIONAL EXPERIENCE

INVENTORY CONTROL INTERN – CLERK   JUL 2020– DEC 2022
Maison Pacifique Fils

- Designed an Excel-based inventory tracking system for real-time monitoring, improving restocking efficiency by 30%.
- Automated data entry processes, reducing manual errors and enhancing sales analysis accuracy.
- Collaborated with sales teams to align inventory levels with demand, optimizing supply chain operations.

INDUSTRIAL ENGINEERING TRAINEE   OCT 2019 – MARCH 2020
New Baron Leveque International Afrique - NBLIA

- Conducted process analyses on production lines, identifying bottlenecks and reducing waiting times.
- Implemented lean manufacturing strategies, increasing daily production rates.
- Delivered training on 5S methodology and CI principles, improving workplace organization.

DATA PROJECTS

FINANCIAL DATA ANALYSIS
Analyzed and visualized a 6-month personal bank statements to uncover key financial trends, optimize expenses, and improve financial decision-making.

- Cleaned and categorized 1,000+ transactions using SQL and Power Query, uncovering spending trends.
- Created interactive Power BI dashboards to visualize income/expense patterns, enabling better financial planning.

GOOGLE DATA ANALYTICS CAPSTONE CASE STUDY: BELLABEAT
Analyzed Fitbit Fitness Tracker Data to uncover trends in non-Bellabeat smart device usage and develop marketing strategies for growth

- Analyzed Fitbit data using R programming to identify user behavior trends (activity, sleep, sedentary habits).
- Developed actionable recommendations to boost engagement, supporting data-driven marketing strategies.
